Practice workbook · Preparing and correcting a manufacturing account

Sorting a manufacturer's costs into prime cost, factory overheads and the income statement, preparing the manufacturing account to production cost, and correcting a draft.

13 question parts: 1 worked-example retry and 12 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

	31 January 2023 $
Other payables – factory power	3 300
Other receivables – factory supervisor's wages	830
Factory power paid	38 200
General expenses	36 000
Insurance	7 800
Purchases of raw materials	198 045
Rent	46 000
Revenue	729 595
Royalties	41 300
Wages paid – production staff – factory supervisor – administration staff	 89 700 24 000 16 590

OLevels.com SCHOOL

Rent and insurance are apportioned 80% to the factory and 20% to administration.

General expenses are apportioned 90% to the factory and 10% to administration.

Depreciation is charged on:

- factory machinery at 15% per annum using the straight line method
- office equipment at 25% per annum using the reducing balance method.

A full year's depreciation is charged in the year of purchase.

2 (a) Identify, by indicating with a tick (✓), where in the financial statements each item would be shown.

The first item has been completed for you.

(6)

Item	Manufacturing account	Income statement	Statement of financial position
Purchase of raw materials	✓		
Accumulated depreciation – plant and machinery			
Carriage outwards			
Factory supervisor's salary			
Purchase of finished goods			
Returns inwards			
Royalties paid			

Dumadi, a manufacturer, provided the following information.

At 1 April 2018	$
Inventories	
Raw materials	12 500
Work in progress	3 600
Finished goods	5 500
Plant and machinery	
Cost	112 400
Accumulated depreciation	65 400
At 31 March 2019	
Prime cost	274 410
Indirect factory wages	16 320
Factory light, heat and power	9 620
Other receivables – rent and rates	1 800
Rent, rates and insurance	37 800
Inventories	
Raw materials	9 200
Work in progress	3 200
Finished goods	8 400

- Rent, rates and insurance are apportioned 70% to the factory and 30% to the office.
- Depreciation is provided on plant and machinery at 20% per annum using the reducing balance method.

1 Leo, a manufacturer, provided the following information for the year ended 31 March 2021.

	1 April 2020 $	31 March 2021 $
Premises		
Cost	500 000	500 000
Accumulated depreciation	100 000	**To be calculated**
Plant and machinery		
Cost	250 000	250 000
Accumulated depreciation	90 000	**To be calculated**
Inventory		
Raw materials	56 000	44 000
Work in progress	64 000	68 400
Finished goods	108 000	112 000
Carriage inwards on raw materials		1 300
Carriage outwards		2 100
Direct wages		82 400
Electricity		18 000
Factory insurance paid		9 000
Indirect factory expenses		79 500
Indirect wages paid		83 650
Other payables – indirect wages		1 350
Other receivables – factory insurance		500
Purchases of raw materials		167 500
Returns inwards		12 000
Returns outwards		17 500
Revenue		630 000
Royalties		15 000

Plant and machinery is depreciated at 20% per annum using the reducing balance method.

Premises are depreciated at 10% per annum using the straight line method.

Both electricity and depreciation on premises are apportioned 75% to the factory.

2022 JUN · Paper 02 (regional R)

Further practice · Attempt part a.i only.

1 Dina, a manufacturer, prepared the following **incorrect** manufacturing account for the year ended 31 March 2022 from the **correct** balances in her trial balance.

Dina
Manufacturing account for the year ended 31 March 2022

	$	$
Revenue	385 000	
Depreciation charge – plant and machinery	11 200	
		373 800
Cost of sales		
Inventory of raw materials 31 March 2022	10 400	
Carriage outwards	360	
	10 040	
Purchases of raw materials	98 400	
Inventory of raw materials 1 April 2021	(9 640)	
		(98 800)
Prime cost		275 000
Factory overheads		
Royalties	1 780	
Insurance	4 000	
Electricity	9 750	
Factory rent	14 000	
Direct wages	38 400	
Indirect wages	(25 700)	
		(42 230)
Work in progress at 31 March 2022	4 430	
Work in progress at 1 April 2021	(4 200)	
Inventory of finished goods at 31 March 2022	5 850	
Inventory of finished goods at 1 April 2021	(6 750)	(670)
Production cost		232 100

Additional information

- No adjustment had been made for indirect wages owing of $1 300 and factory rent paid in advance of $2 000
- The depreciation charge did not include a full year's depreciation charge on a new machine costing $30 000. Machinery is depreciated at the rate of 20% per annum using the straight line method.
- Insurance and electricity should have been apportioned 80% to the factory and 20% to administration.

Following completion of the manufacturing account the partnership was made aware that some of the costs allocated in full to the manufacturing division should have been apportioned in part to the administration department.

- Insurance and rent and rates should have been apportioned 80% to the factory and 20% to administration.
- The factory machinery accounted for 60% of all non-current assets.
- Carriage outwards accounted for 25% of the carriage inwards charge.
